

Clinical Internship

Prerequisite: Health Science Theory AND Scientific Research & Design/Clinical Rotations AND Selection Process

Course: 1431CA/1431CB Credits: 2 Length: 36 weeks Placement: 12

Course Description

The Clinical Internship class is designed to give students practical application of previously studied knowledge and skills. Practicum experiences can occur in a variety of locations appropriate to the nature and level of experience. Students are responsible for independent study supervised by instructor and clinical supervisors. Students must provide their own transportation to internship sites. Prerequisite courses are Medical Terminology/Principles of HealthCare and Skills/A&P and advancement through the selection process.

Student Activities

Students spend a portion of class time at off campus internships in health care settings. In class activities are largely centered around project based lessons on many interesting and relevant health care topics. Students develop patient care skills such as phlebotomy, IV therapy, foley catheter insertion and childbirth.

Students will also have the opportunity to develop their speaking and leadership skills in many varied situations.

There is a \$25 course fee to help cover the cost of Liability Insurance, TB test, urine drug screening, background checks and patch.

Organizations/After School/Competitions

HOSA is a student lead, community service organization. There are opportunities for developing leadership skills through HOSA competition as well as community service.

Additional Considerations

Students must provide their own transportation and complete independent internship. Students need fine motor skills and mobility.
