

Automotive Basics

Prerequisite: None

Course: 180OCT

Credits: 1

Length: 18 weeks

Placement: 9-12

Course Description

This is the first class leading to an entry level position in repairing cars. The students will be introduced to careers in the automotive industry, safety, measuring skills, plus hand and power tools. Minor maintenance and light repair procedures in an automotive shop are also introduced.

Student Activities

Students will be working with tires and wheels, measuring tools and will perform preventative maintenance procedures and brakes theory.

Student must supply safety glasses and proper clothing

Certification

Valvoline Motor Oil Certification
 Student Cost: \$0 BBIA Cost: \$0

SP2 Ethics & You in Auto Industry
 SP2 Land That Job
 Student Cost: \$0 BBIA Cost: \$0

Additional Considerations

Students need fine motor skills and mobility. Students handle tools. If seeking certification, curriculum cannot be modified.

Organizations/After School/Competition

SkillsUSA is a partnership of students, teachers and industry working together to ensure America has a skilled workforce.
